

Actionable data about communities.

SAVI is a data platform that empowers people to unearth and navigate actionable information about their communities to build on assets and solve pressing problems.

Local experts.

Our locally-based expert staff know our communities and the data about them. Through tailored support, we help think through problems and formulate plans for addressing community challenges.

More than a data source.

SAVI serves as a strategic partner to anyone looking to leverage information to improve Central Indiana.

Trusted source.

SAVI provides a transparent and apolitical source of high-quality information that users can trust.

IndyVitals

Explore dashboards measuring neighborhood health and sustainability.

Indyvitals.org

SAVI contains 25,000 community assets—data about organizations, programs, and services meeting the needs of area residents—and 13,500 community-level indicators measuring quality of life, well-being, and sustainability. Our data covers what matters most to communities, from demographics to housing and from health to the economy.
